

White zip glowing (dim out blinds)

SHY® zipper ribbon is available in the following colours – black, grey & white. Please be aware during daylight hours, or with strong artificial lighting behind the cloth, the white zip will glow which is particularly obvious with dim out blinds.

- White zip is translucent and therefore not recommended for dim out applications
- Black and grey zip is less translucent so the effect is far less pronounced.
- Please ensure your customer is aware of this characteristic when choosing zip colour

Please note: - When using screen fabrics, the colour of zipper ribbon used will generally be the one which best matches the cover.
